

Dedicated AI compute. Your software. Your control.

SicurAI is developing the Muxaro campus in Bivona, Sicily, Italy, with planned NVIDIA GB300 NVL72 capacity for dedicated customer deployments.

2,304

planned GPUs

32

planned compute racks

Italy

intended location

01 / PLANNED CAPACITY

Campus	Muxaro, Bivona, Sicily, Italy
Compute architecture	NVIDIA GB300 NVL72; 72 GPUs per rack [1]
Planned scale	32 compute racks; 2,304 GPUs in total
Initial service model	Dedicated bare-metal; customer-operated software and control plane, with agreed responsibility boundaries.
Allocation approach	Full-cluster discussions prioritized. Smaller allocations on request, subject to final partitioning and minimum size.

TARGET SERVICE AVAILABILITY

March - April 2027

Subject to final configuration, delivery and commissioning. Final schedule and allocation will be agreed by contract.

Configuration status: Final OEM, storage and cross-rack fabric design, support scope and SLA remain to be confirmed.

Project basis: SicurAI project planning, draft dated 5 September 2026.

Define your allocation.

Share your requirements so the technical scope, timing and commercial proposal can be developed together.

WHAT TO INCLUDE IN YOUR REQUEST

01	Capacity	GPUs or racks required; full-cluster or smaller allocation; expected expansion.
02	Dates and term	Desired service start, ramp profile, contract duration and timing flexibility.
03	Workload	Training, inference or other workload; software stack, utilization and performance needs.
04	Data and control	Data residency, isolation, access, connectivity and software/control requirements.

SCOPE TO DEFINE IN THE PROPOSAL

Confirm what is included, who operates it and where responsibility sits.

- ☐ **Compute**
Allocation, configuration and acceptance
- ☐ **Storage**
Capacity, performance and data services
- ☐ **Software**
Customer stack and control-plane duties
- ☐ **Energy & facilities**
Power, cooling and facility responsibilities
- ☐ **Network**
Fabric, external links and connectivity
- ☐ **Support**
Coverage, escalation and agreed SLA

1 Request
Send a nonbinding capacity and requirements request.

2 Diligence
Review configuration, delivery assumptions and scope.

3 Agreement
Agree allocation, schedule and reservation terms by contract.

Private sovereignty, defined explicitly. The intended Italy location is one element. Isolation, access, software and contracting controls must also be specified and agreed.

A request is nonbinding and does not reserve capacity. Reservation and service commitments arise only under the applicable agreement.

Discuss your requirements
